DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 25 and 29 to 34, drawn to testing integrated circuits, classified in class 714, subclass 724.
 - II. Claims 26 to 28, drawn to fault detecting in electrical circuits, classified in class 324, subclass 765.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group II claims 26 to 28 have separate utility such as fault detection in an electrical device. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Lawrence Bassuk on 8-1-01 a provisional election was made without traverse to prosecute the invention of group II, claims 26 to 28. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1 to 25 and 29 to 34 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
